

9. Changing sentences

A text will be designed with a certain context. Some of the sentences in the text will have instructions in the parenthesis on how to change them. Depending on the marks in the test item, students will be asked to change 5 or 10 sentences. Students will write only the changed sentence as their answers. They can write the changed sentences in any order but must use the correct number used for each sentence in the given text.

10. Rearranging of sentences

Use 10 detached sentences for classes 6, 7, and 8 (See the sample questions for these grades). For SSC, SS will rearrange eight parts of a story/passage (See the sample question for SSC.). Test your test item (with someone else or you sit for a test) to check whether the sequence of the answer vary. If the answer varies and each variety has a complete meaning, redesign the test. Use linking words/sentence connectors to maintain cohesion and coherence in the text. Learners do not need to reproduce the text in their answer scripts. If they arrange the corresponding serial of the texts correctly (such as b. d. a, f or v, iii, vi. I etc), they will get full credit. Please remember that the test objective here is the organisation of sentences, not the copying of texts from the question paper. However if any learner comes with sentences written in a random text, there is no need to penalize him/her. Students will get credits for the correct answers. For example, if the answer is like this:

a. X b. ✓ c. ✓ d. X e. ✓ f. ✓ g. X h. X i. ✓ j. X the student will get 5 marks.

The test has no relation with the texts used in the previous test items.

11. Writing summary

Use a text not exceeding 150 to 200 words for classes 6 to 8 and not exceeding 300 words for classes 9-10 in the question paper. Learners will produce a summary using one third words of the given text. For an example, if the original text has 150 words, learners will produce the summary in 50 words. However, 5% plus minus is okay. This answer should be written in random texts not in isolated sentences. There is no question of counting number of sentences in summary. So DO NOT mention in the question paper how many lines or sentences learners will use to make a summary. The number of words used here is important. Make sure that they are writing in their own words, not copying some sentences from the text. Practice them to avoid examples or explanations in writing a summary. A fresh text should be given to make summary. No text used in the previous test items can be used here.

12. Writing a paragraph answering questions

Make sure that your learners are answering the questions in writing the paragraph. However, if there are 5 questions to answer, it does not mean that students will write only five sentences. They will use sentences as per their discretion but the paragraph as a whole answer the questions. If there are 10 marks for this item, learners should be able to make at least 10 sentences. The more the better. Keep an eye on the content rather than the mechanical calculation of sentences. Assess the paragraph from different aspects such as grammar, ideas, communication, organisation etc.; do not only assess the paragraph only from the perspective of grammar accuracy.

13. Completing a story

There will be the beginning of a story in the question paper. Students will continue the story and complete it. The answer will vary here. Completing a story when given at classes 6-8 should be more guided (See sample question for classes 6-7.) where question setter not only begins a story but also provides with some clues for the extension of ideas. Students will complete the story following the clues. A good idea is to mention the word limit when there is no clues for the students. Assess the paragraph from different aspects such as grammar, ideas, communication, organisation etc.; do not only assess the paragraph only from the perspective
